BLOCH IN SOUTH AFRICA

BLOCH was invited by George Kuratle to the annual Wood Conference in Cape Town at the end of February 2017. In the form of a talk and workshop the project and its journey will be presented to the audience. After the conference BLOCH continued touring through several South African cities and cultural institutions, providing a series of events, performances, exhibitions, talks, workshops and screenings. In these months, BLOCH will collaborate with a number of local artists, cultural producers and institutions and create a

diversity of forms of artistic and cultural production. The outcomes and initiatives will be presented first in South Africa and then later travel with BLOCH to the next stations (Middle East, South America, Australia) and will become part of the 'BLOCH Archive' which has its final presentation in 2020/21 in Switzerland (as an exhibition, festival and documentary). There will be a South Africa chapter of the video documentary covering all events that happen in South Africa. Additionally, the South Africa Station will also be featured in the BLOCH publication coming out in September this year.
